1. This communication is in response to the amendment filed on 04/06/05.

The arguments to the Claims 23-36 have been fully considered and have overcome the rejections under 35 U.S.C. 102(a) as being anticipated by Hardware Reference Manual, "Intel™ IXP1200 Network Processor Hardware Reference Manual", version 1.0, June 2000 (hereinafter: The manual).

The manual remains the closest art of record.

### **Reasons for Allowance**

2. Claims 23-36 are allowed.

Prior art of record, Hardware Reference Manual, "Intel™ IXP1200 Network Processor Hardware Reference Manual", discloses a plurality of microengines, each of the microengines comprising a plurality of executable threads executing in a target microengine and providing hop debugging support. The manual describes debug libraries with functions to provide a user with pausing, hopping the Microengines and modifying program counters for jumping to stored instructions.

Applicants, with regards to the amended limitations of independent Claims 23 and 30, point out that the recited limitation "loading a series of hop instructions from a debug library" is not described in the manual (Remarks, page 7). Applicants point out that the manual discloses only the debug libraries that include only specific functions (Remarks, page 8), hoping in the manual is merely the alternating of "running" and "pausing" from one context change point to the next (Remarks, page 9).

Therefore, the following is an examiner's statement of reasons for allowance: The cited prior arts taken alone or in combination fail to teach claimed invention as a method and a processor, comprising at least features:

*"pausing execution of the threads; loading a series of hop instructions from a debug library; storing program counters for the threads;  
modifying the program counters of the target micro engine to jump to a start of the series of hop instructions, and modifying the hop instructions to return to the stored program counter",*

Art Unit: 2192

as recited in independent Claim 23 and in such manners in independent Claim 30.
